Summary

As a software engineering student at the Institute of Computer Engineering Technology (iCET), learning advanced skills in Java, MySQL and software development. I am also pursuing my Certified Master Diploma from iCET. I have a completed first semester diploma in software engineering from IJSE and a diploma in English from ICBT.

As a member of Generation ALPHA, I developed my communication skills, personal branding & teamwork. Which have helped me improve my communication and problem-solving abilities.

I have also gained practical experience as a trainee at Metro Computers Technology, A leading company in computer hardware and software solutions in Matara. There, I worked on various projects involving hardware installation, troubleshooting, maintenance and repair. And I completed NVQ Level 4 Computer Hardware Technician Course in Technical College, Matara.

I have completed multiple certifications from LinkedIn on generative AI, including one on how it can enhance online search and another on how to streamline work with Copilot, a generative AI-powered chatbot.

My goal is to become a proficient and versatile software engineer and Proceed through it.
